Prepared By Patty Watt

BMP# Physical Plant #18

TITLE: REFRIGERANT WASTE OIL

Regulatory Citation: 6 NYCRR Part 360-14 and 374-2

Applicability: Oil generated from refrigeration equipment

Purpose: Proper collection and disposal of refrigerant oils.

Person/Dept Responsible: HVAC Technicians

Schedule: As needed

Procedures: Refrigerant waste oils generated as a result of repair or maintenance activities will be collected in the five gallon container labeled "Waste refrigerant oil" located in the McDonough refrigerant room. The container will be kept closed at all times except when adding oil.

When the container is 80 % full, the HVAC Technicians will inform the Director of EHS to make arrangements for pick up by the used oil vendor selected through the Automotive Department. The Director of EHS will be responsible for ensuring that the oil meets the waste characterization that has been previously performed or will repeat testing if there is any reason to suspect changes in content or if required by the used oil vendor.

Record keeping: oil shipping records; waste characterization record

Record Location: EHS Office environmental files

Current vendor: Sheldon Oil

Contact: Exec Mgr Physical Plant (629-7427)
Assistant to Exec Mgr (629-7361)
Director of Environmental, Health and Safety (629-7163)
